

BCP Disclosure Statement

PEP Advisory LLC has developed a Business Continuity Plan on how we will respond to events that significantly disrupt our business. Since the timing and impact of disasters and disruptions is unpredictable, we will be flexible in responding to actual events as they occur. With that in mind, we are providing you with this information on our business continuity plan.

Contacting Us – If after a significant business disruption you cannot contact us as you usually do at 713-804-7575, you should call our alternative number 281-661-1747 or go to our website at <https://pickeringenergypartners.com/advisory/>.

Our Business Continuity Plan – We plan to quickly recover and resume business operations after a significant business disruption and respond by safeguarding our employees and property, making a financial and operational assessment, protecting the firm’s books and records, and allowing our customers to transact business. In short, our business continuity plan is designed to permit our firm to resume operations as quickly as possible, given the scope and severity of the significant business disruption.

Our business continuity plan addresses: data backup and recovery; all mission critical systems; financial and operational assessments; alternate communications with customers, employees, and regulators; alternate physical location of employees; critical supplier, contractor, bank and counter-party impact; regulatory reporting; and assuring our customers prompt access to their funds and securities if we are unable to continue our business.

Varying Disruptions – Significant business disruptions can vary in their scope, such as only our firm’s office, the city where we are located or the whole region. Within each of these areas, the severity of the disruption can also vary from minimal to severe. In the event of a significant business disruption, we have plans to place to move to a back-up location or remote locations as necessary.

For more information – If you have questions about our business continuity planning, you can contact us at 713-804-7575.
